## **DETAILED ACTION**

### ***Preliminary Amendment***

1. Applicant's submittal of a preliminary amendment was received on March 22, 2004, wherein claims 1-73 were cancelled and new claims 74-77 were added.

### ***Allowable Subject Matter***

2. Claims 74-77 are allowed over the prior art.
3. The following is an examiner's statement of reasons for allowance: Regarding independent claims 74 and 76, the prior art did not disclose wherein the outer shell sever comprises first and second outer shell sever surfaces, such that at least a portion of said first and second outer shell sever surface are in direct contact with one another after said outer shell is formed. In comparison, the prior art references emphasize the use of a gap or space where material has been physically removed by machining, leaving a gap. Such design will generally result in potential sagging and potential readout of the top surface of the panel. This gap is shown in Ball ('558) as a groove into the foam from the underside that is of the same width as the separation cut through the substrate. Thus, Ball does not disclose an outer shell having an outer shell line of mechanical weakness comprising an outer shell reduced thickness portion, nor an outer shell sever or sever surfaces that are in direct contact with one another. None of the other prior art references cited disclose this particular claim limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
